

Obtaining a permit for a Best Barns shed or garage kit

*Do-it-Yourself kits from Best Barns are designed for use as storage buildings or garages only. Use for any other purposes is neither implied nor inferred.**

Building code offices and HOA's may require additional documents to obtain a permit. The homeowner's first step is to contact their local code office and ask what is needed for the size of building to be purchased.

Typically, the necessary documentation may include some or all of the following.

- o Elevations showing at least two sides of structure.
- o Site plan showing existing structures and proposed build site.
- o Engineered drawings for truss system indicating snow and wind load ratings.**
- o Cross sections of wall framing and foundation.
- o Tie down locations for high wind load areas.***

Permit requirements vary based on location. Some areas may not require a permit at all. The documents provided by Best Barns are intended to help the homeowner with the permit process but do not guarantee a permit will be issued. It is the homeowner's responsibility to determine if a permit is required and submit the necessary documentation.

*Any alteration to the construction of Best Barns sheds or garages may require the services of a civil engineer to meet local building codes. Best Barns cannot provide these additional services.

** Engineered truss drawings stamped for your individual state can be obtained upon request. Some models do not have wind and snow load ratings. A non refundable fee will be required to purchase stamped drawings. Contact us directly at 800-245-1577 for further details.

*** Certain states such as Florida and California have stringent requirements for obtaining a permit. Depending on your location, a civil engineer's services may be required to provide necessary documents. These services are the homeowner's responsibility to obtain from an engineer within the state of build location and are not included in the purchase of a shed or garage kit.

DESIGN CRITERIA

INTERNATIONAL BUILDING CODE
IBC 2021, IBC 2018, IBC 2015 DESIGN CRITERIA :

DEAD LOAD (D):

ROOF COLLATERAL DEAD LOAD 2.5 PSF

LIVE LOAD (Lr):

ROOF LIVE LOAD 20 PSF

SNOW LOAD (S):

GROUND SNOW LOAD 35 PSF
SNOW LOAD IMPORTANCE FACTOR (Is) 1.0
EXPOSURE FACTOR (Ce) 1.0
THERMAL FACTOR (Ct) 1.2
GOVERNING ROOF SNOW LOAD 26.95 PSF

UNBALANCED SNOW LOAD 35 PSF

WIND (W):

ANALYSIS PROCEDURE: ASCE 7-10 / ASCE 7-16
BASIC WIND SPEED: 160 MPH
EXPOSURE CATEGORY: C

LOAD COMBINATIONS:

1.0 D
1.0 D + 1.0 L
1.0 D + 1.0 (Lr or S)
1.0 D + 0.75 L + 0.75 (Lr or S)
1.0 D + (0.6 W)
1.0 D + 0.75 (1.0 W) + 0.75 L + 0.75 (Lr or S)
0.6 D + 1.0 W

NOTES:

- UNBALANCED SNOW LOADS HAVE BEEN CONSIDERED IN THE DESIGN.
- WIND LOADING IS BASED ON 3-S GUST ULTIMATE WIND SPEED, EXPOSURE C, PER ASCE 7.
- LOADS ARE BASED ON RISK CATEGORY II.
- SEE ADDITIONAL SHEETS FOR MEMBER CHECKS.

DESIGN DETAILS

A - TOP CHORD	2X4
B - BOTTOM CHORD	-
C - WEB	-
D - COLLAR-TIE	-
SPACING	24" C/C
WOOD MATERIAL	SPF NO. 2
MAX. UNBRACED LENGTH OF TOP CHORD	6'-0"
DEAD LOAD DEFLECTION	L / 180
LIVE LOAD DEFLECTION	L / 240
DEAD + LIVE LOAD DEFLECTION	L / 180
UPLIFT REACTION AT CONN. TO WALL (LBF)	160
LATERAL REACTION AT CONN. TO WALL (LBF)	563
BEARING REACTION AT CONN. TO WALL (LBF)	310

WOOD DESIGN NOTES:

C _D - LOAD DURATION FACTOR FOR WIND	1.6
C _D - LOAD DURATION FACTOR FOR SNOW	1.15
C _M - MOISTURE CONTENT	1.0
C _t - TEMPERATURE FACTOR	1.0

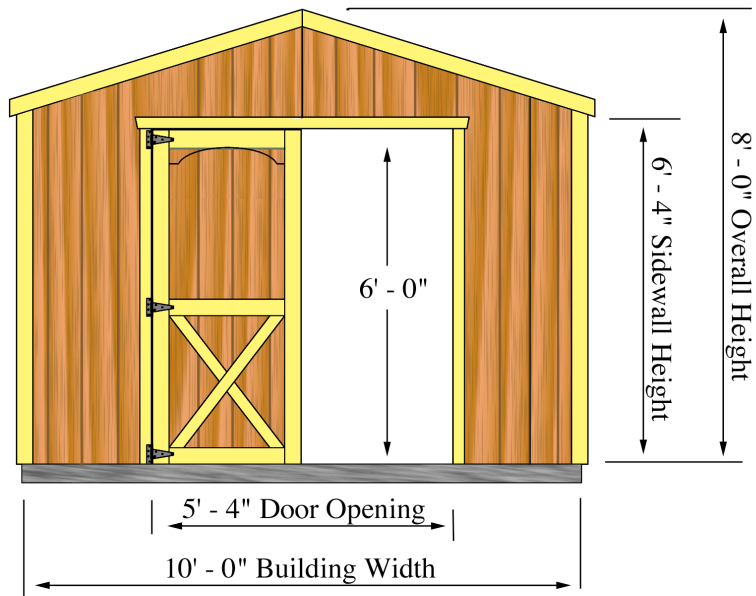

CERTIFICATION EXPIRY: XX/XX/XXXX
STAMP DATE EXPIRES: XX/XX/XXXX
DATE SIGNED: XX/XX/XXXX

DESIGN BY / CHECKED BY: A.W. / O.A.
PROJECT NO.: 476-23-0575
CLIENT: BEST BARNS
TITLE: TIMBER TRUSS
STATE: XX - XXXXXXXXXX
DATE: 01/24/2024

Before you order our kit or begin construction, obtain a building permit. If additional documents are required contact questions@barnkits.com.

Elm Elevation

Foundation: By owner

Wall Framing: Constructed from 2x4 pre-cut wall studs spaced 24" on center between top and bottom plates.

Siding: Louisiana-Pacific 'Smart Panel' primed 8" o.c. groove with 50 year warranty, 5 year labor replacement. Siding is pre-cut for fast and accurate field assembly.

Roof System: 2x4 trusses spaced 24" on center, covered with pre-cut 7/16" OSB roof sheathing. *Shingles by owner.*

Exterior Trim: White pine trim for corners, door and gable trim. Doors are pre-built

Hardware: Nails for all framing and door hardware included. Windows are optional and extra.

Optional Floor: is constructed with treated 2x4 framing. Floor joists are spaced 16" on center and covered with 5/8" OSB (oriented strand board).

Foundation Size

12'x10'12'-0" long x 10'-0" deep

16'x10'16'-0" long x 10'-0" deep

2x4 Treated Joist 16" o.c.

* Leveling Blocks

* If necessary use bricks, patio stones or similar material to level or provide additional support to the floor. If your ground has low areas consider adding gravel and or 4x4 treated timbers to rest the floor on.

This document illustrates common foundation types which can be used for construction of Best Barns 10 ft. wide structures. Alteration may be necessary to conform to homeowners intended use and or permitting requirements. Drawings not to scale.

Check appropriate foundation cross section and provide specifications as necessary.

Homeowner may also design and draw in space provided for custom foundation type.

Diagram illustrating the components and dimensions of a gabion structure:

- 3/8" L.P. Smartside
- 2x4 Studs 24" o.c.
- 2x4 Plate
- ___ ga Wire Mesh
- ___" Thick Cement
- ___" Deep Gravel
- ___ ga Rebar
- Depth

Diagram illustrating the components and connections of a roof structure:

- 2x4 Studs 24" o.c.
- 3/8" L.P. Smartside
- 2x4 Plate
- 2x4 PT Joist Header
- 3/4" Plywood
- 2x4 PT Joists 16" o.c.
- 4x4 PT Timber

Site Plan for:

Manufactured by:

phone: 800-245-1577
fax: 724-646-0772

Instructions:

Draw property line, existing structures and proposed placement of building.

Homeowner may also be required to show trees and shrubs. Check with HOA or permit office for requirements.
